

# SYNCHRONIZING YOUR BIM WORKFLOW

We offer consulting with an eye towards helping the customer set up policies and procedures when shifting to a BIM-focused workflow. This may include consulting on integration of new products and settings into their existing workflow. We will also offer special topics training, or custom training on Tekla Structures.

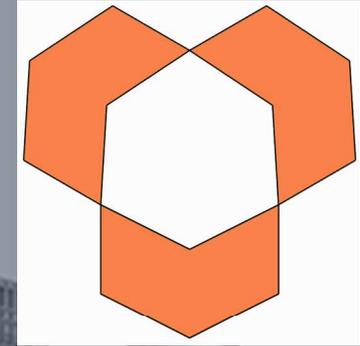

Helping companies create a successful workflow isn't only a commitment, but also a passion. Our variety of BIM consulting options are designed to fit with your schedule and budget. Check out our site to learn about what we have to offer, and contact us to schedule an introductory session.

We are here to help you reinforce your company's systems so that they will stand the test of time.

**Don't Waste  
Resources with  
Disjointed  
Processes...  
Synchronize  
them.**

# BIM IS WAY MORE THAN A MODEL

---

Many people refer to BIM as Building Information Modeling, but it is more than that...It is more aptly defined as Building Information Management. It is not simply bringing several 3D and 2D models together to show design intent, it is managing the whole process from the initial design all the way through owner operation.

The model is just the repository or envelope for all of the data that is collected while working through the desing to construction process.

Bringing this data together takes solid planning and proper structuring.

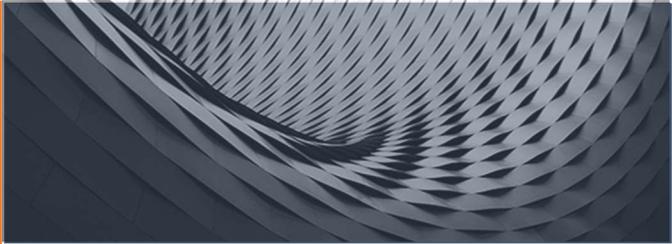

## WHAT WE OFFER

---

Over 25 years of building and construction experience gives our company a unique position to address your needs and concerns. Our experience includes working with some of the largest companies in the world to small one-person firms.

Some of what we offer:

- ❑ Workflow planning.
- ❑ Standards creation.
- ❑ Product recommendations.
- ❑ Targeted training.

## ORGANIZE YOUR BUSINESS

---

Our intention is to guide you and your company through the process of either bringing BIM onboard, or adding new steps in your BIM process.

Through good conversations and strategic planning, we create and provide suggested workflow actions to help you navigate the world of BIM management using VDC (Virtual Design and Construction) techniques and tools.

We strive to produce a pathway for you to succeed.
